```
==> Pouring git--2.52.0_1.arm64_tahoe.bottle.1.tar.gz
==> Caveats
The Tcl/Tk GUIs (e.g. gitk, git-gui) are now in the `git-gui` formula.
Subversion interoperability (git-svn) is now in the `git-svn` formula.
==> Summary
🍺  /opt/homebrew/Cellar/git/2.52.0_1: 1,733 files, 59.7MB
==> Running `brew cleanup git`...
Disable this behaviour by setting `HOMEBREW_NO_INSTALL_CLEANUP=1`.
Hide these hints with `HOMEBREW_NO_ENV_HINTS=1` (see `man brew`).
==> Caveats
zsh completions and functions have been installed to:
  /opt/homebrew/share/zsh/site-functions
==> git
The Tcl/Tk GUIs (e.g. gitk, git-gui) are now in the `git-gui` formula.
Subversion interoperability (git-svn) is now in the `git-svn` formula.
divitkulkarni@Divits-MacBook-Air ~ % git --version
git version 2.50.1 (Apple Git-155)
divitkulkarni@Divits-MacBook-Air ~ % sl
zsh: command not found: sl
divitkulkarni@Divits-MacBook-Air ~ % git
usage: git [-v | --version] [-h | --help] [-C <path>] [-c <name>=<value>]
           [--exec-path[=<path>]] [--html-path] [--man-path] [--info-path]
           [-p | --paginate | -P | --no-pager] [--no-replace-objects] [--no-lazy-fetch]
           [--no-optional-locks] [--no-advice] [--bare] [--git-dir=<path>]
           [--work-tree=<path>] [--namespace=<name>] [--config-env=<name>=<envvar>]
           <command> [<args>]

These are common Git commands used in various situations:

start a working area (see also: git help tutorial)
   clone      Clone a repository into a new directory
   init       Create an empty Git repository or reinitialize an existing one

work on the current change (see also: git help everyday)
   add        Add file contents to the index
   mv         Move or rename a file, a directory, or a symlink
   restore    Restore working tree files
   rm         Remove files from the working tree and from the index

examine the history and state (see also: git help revisions)
   bisect     Use binary search to find the commit that introduced a bug
   diff       Show changes between commits, commit and working tree, etc
   grep       Print lines matching a pattern
   log        Show commit logs
   show       Show various types of objects
   status     Show the working tree status

grow, mark and tweak your common history
   backfill   Download missing objects in a partial clone
   branch     List, create, or delete branches
   commit     Record changes to the repository
   merge      Join two or more development histories together
   rebase     Reapply commits on top of another base tip
   reset      Reset current HEAD to the specified state
   switch     Switch branches
   tag        Create, list, delete or verify a tag object signed with GPG

collaborate (see also: git help workflows)
   fetch      Download objects and refs from another repository
   pull       Fetch from and integrate with another repository or a local branch
   push       Update remote refs along with associated objects

'git help -a' and 'git help -g' list available subcommands and some
concept guides. See 'git help <command>' or 'git help <concept>'
to read about a specific subcommand or concept.
See 'git help git' for an overview of the system.
divitkulkarni@Divits-MacBook-Air ~ % ls
# Program to calculate area of Circle, R.py     Desktop                                 exp1                                    Movies                                  Public
Applications                                    Documents                               exp1.Java                               Music
Autodesk                                        Downloads                               Library                                 Pictures
divitkulkarni@Divits-MacBook-Air ~ % cd
divitkulkarni@Divits-MacBook-Air ~ % mkdir
usage: mkdir [-pv] [-m mode] directory_name ...
divitkulkarni@Divits-MacBook-Air ~ % cd
divitkulkarni@Divits-MacBook-Air ~ %
```

Less More
This is your contribution graph. Your first square is for joining GitHub and you'll earn more as you make additional contributions. More contributions means a higher contrast square color for that day. Over time, your chart might start looking something like this.
We have a quick guide that will show you how to create your first repository and earn more green squares!
